ROMANIAN MATHEMATICAL MAGAZINE

In ΔABC the following relationship holds:

$$\frac{1}{w_a}+\frac{1}{w_b}+\frac{1}{w_c}\ge\frac{3\sqrt{3}}{s}$$

Proposed by Nguyen Hung Cuong-Vietnam

Solution by Daniel Sitaru-Romania

$$\frac{1}{w_a}+\frac{1}{w_b}+\frac{1}{w_c}\overset{AM-GM}{\ge}\frac{3}{\sqrt[3]{w_aw_bw_c}}\ge\frac{3}{\sqrt[3]{r_ar_br_c}}=$$

$$=\frac{3}{\sqrt[3]{\frac{F}{s-a}\cdot\frac{F}{s-b}\cdot\frac{F}{s-c}}}=\frac{3}{\sqrt[3]{\frac{F^3}{(s-a)(s-b)(s-c)}}}=\frac{3}{\sqrt[3]{\frac{F^3s}{s(s-a)(s-b)(s-c)}}}=$$

$$=\frac{3}{\sqrt[3]{\frac{F^3s}{F^2}}}=\frac{3}{\sqrt[3]{Fs}}=\frac{3}{\sqrt[3]{rs^2}}$$

$$\frac{3}{\sqrt[3]{rs^2}}\ge\frac{3\sqrt{3}}{s}\Leftrightarrow s\ge\sqrt{3}\cdot\sqrt[3]{rs^2}\Leftrightarrow s^3\ge3\sqrt{3}\cdot rs^2\Leftrightarrow$$

$$\Leftrightarrow s\ge3\sqrt{3}\ (Mitrinovici)$$

Equality holds for $a=b=c$.
